

INTEROFFICE MEMORANDUM

DATE: April 25, 1985

TO: Mr. Veral Pinkerton, Bridge Division Engineer
FROM: Brooks O. Nichols, Asst. Chief Engineer - Design
SUBJECT: Bridge Deck Rehabilitation

Generally, it is our policy to replace bridge decks on Interstate 4R projects where FHWA is in agreement. In no way does this eliminate the option of overlaying a deck. Where overlaying is the best treatment considering traffic handling and deck condition (no fatigue cracking, etc.). However, the replacement of the deck should always be the first option.
