

STATE OF ARKANSAS

Eleventh Biennial Report

OF THE

ARKANSAS STATE HIGHWAY
COMMISSION

For the period from February 1, 1933, to July 1, 1934,
with Supplementary Report for the period March 1,
1932 to February 1, 1933

Letter of Transmittal

*To the Governor and the General Assembly
of the State of Arkansas:*

In compliance with the requirements of Act No. 302 of the Acts of 1913, amended by Act No. 7 of the Acts of 1921, we present the Eleventh Biennial Report of the Arkansas State Highway Commission for the fiscal years 1933 and 1934.

It will be noted that the period embraced covers seventeen months from February 1, 1933, to July 1, 1934. In addition, there is included a supplementary report covering eleven months, from March 1, 1932, to February 1, 1933.

Respectfully submitted,

J. S. CARGILE, Chairman

L. A. BLACK

DAVE BLOCK,

BEN B. JOHNSTON

CHAS. H. MURPHY

*Members, State Highway
Commission*

FOREWORD

The Forty-ninth General Assembly in regular session passed Act No. 3, which reorganized the State Highway Department, February 1, 1933. Act No. 92, approved March 16, 1933, changed the end of the fiscal year from February 28 to June 30, to coincide with the fiscal periods of other State Departments. This Act provided that the fiscal year 1933, under the new Commission, should consist of a period of five months, from February 1, 1933, to June 30, 1933, and that thereafter the regular fiscal year should run from July 1, to June 30, inclusive.

The fiscal year 1933, therefore, as reflected in this report, is for the period of five months, and the fiscal year 1934, for twelve months. Thus, for all accounting purposes, the biennial period is seventeen months. All reports submitted herein from the accounting department are based on that period of time, and do not include any reports of receipts or disbursements after the end of the biennial period, June 30, 1934. Some of the reports from the engineering department vary somewhat from this biennial period, but the dates of termination of such reports are indicated therein.

A supplementary report is appended covering the period of eleven months, from March 1, 1932, to February 1, 1933, and reference to this section will disclose the activities of the former Commission for that period, part of which is not included in the Tenth Biennial report.

HIGHWAY LEGISLATION

Act 3, Criticism of the administration of the affairs of the Highway Department, emanating from various sources, found its first concrete expression in the legislative action of the 1931 regular session which empowered an investigation of all transactions of the department for the period January 1, 1927, to the date of the act. The culmination of this action resulted in the passage of Act 3, approved January 27, 1933, allowing the reorganization of the Department by recalling the existing Highway Commission and creating a new Commission composed of the same number of members, appointive by the Governor and subject to confirmation by the Senate. The act also provided for the office of a Director of Highways, to be named by the Commission, for the purpose of actively administering and supervising the affairs of the Department.

Act 6, For the purpose of inducing the operation of motor vehicles with the object of obtaining greater revenue through the increased consumption of gasoline, Act 36, approved January 30, 1933, provided for a reduction in the fee previously required for the registration and licensing of automobiles in the amount of approximately fifty per cent. This act also provided for a further reduction in the fee of another fifty per cent when the car registered was four years old or more. Act 36, approved February 17, 1933, set the license fee for trucks of the smaller capacities at a substantially lower rate but correspondingly increased the fee for trucks carrying the heavier and maximum loads. Act 44, approved February 18, 1933, and Act 51, approved February 22, 1933, provided for revisions in fees for automobile dealers' registrations and for fees covering the registration and licensing of motorcycles.

Act 9, Certain duties previously enjoined upon the Highway Department were transferred to the Revenue Department through the provisions of Act 9, approved February 2, 1933. Such duties involved the supervision of the registration and licensing of motor vehicles and the operation of toll bridges, including the collecting of tolls and the appointment of toll collectors. Act 45, approved February 18, 1933, similarly transferred the highway patrol and the enforcement of traffic rules and regulations. Act 94, approved March 16, 1933, empowered the Commissioner of Revenue to collect motor vehicle registration fees.

Act 19, Although the legislature and the holders of outstanding Arkansas highway securities were not yet in accord as to methods of financing the maturities and interest of such obligations, both bodies recognized the importance of the state protecting the existing investment in the highway system through the proper maintenance of such investment. The result was Act 19, approved February 7, 1933, which set aside the sum of two million dollars annually of the first moneys accruing to the state highway fund for the maintenance of state highways and the administrative expense of the highway department. Act 48, approved February 22, 1933, was an attempt by the legislature to divert a part of the revenue formerly pledged to satisfy outstanding obligations to a special county fund for use of school bus and rural mail routes. The Federal Court later held this act to be unconstitutional on the ground that it impaired the obligation of an existing contract. Act 86, approved March 7, 1933, Act 92, approved March 16, 1933, and Act 93, approved March 16, 1933, provided for appropriations for the biennium as well as limiting the salaries and number of employees of the Department.

Act 39, Act 39, approved February 18, 1933, provided for service of process in civil suits giving Arkansas Courts jurisdiction over non-resident automobile owners operating motor vehicles in this state, by declaring the Secretary of State the authorized agent of such non-resident for service of summons. Act 50, approved February 22, 1933, defined procedure and methods of filing suits against the Highway Commission incident to the administration of the highway department. It also provided for procedure in allowing claimants service in filing suits for damages against non-resident contractors. Act 115, approved March 18, 1933, facilitated the procuring of rights-of-way for state highways by providing that when the Highway Commission has filed a petition in any circuit court for the condemnation of right-of-way for highway purposes and service has matured that the circuit clerk shall at the request of the Attorney General certify the pendency of the suit to the Circuit Judge, who shall not sooner than five days thereafter convene the Circuit Court to hear said petition, and that the Circuit Judge shall hear and determine all questions of law and of fact arising in such petitions.

Act 123, Act 123, approved March 18, 1933, authorized the State Highway Commission to promulgate rules and regulations governing the use of state highways and placed the power of enforcement with the Department of Revenues through the State Highway Patrol. The regulation of privately owned ferries operating adjacent to and in competition with state owned toll bridges was

authorized through Act 139, approved March 24, 1933. Any ferry operating within three miles of a toll bridge could be defined as being within the competing area. To prevent the disfiguring of landscapes along the public highways Act 165, approved March 25, 1933, made it a misdemeanor to store wrecked or junked automobiles within 200 yards of a memorial highway unless proper effort was made to screen such material yard from view of the highway.

Act 167, 1933 The methods and procedure provided by Act 15 of the special session of 1932 for the refinancing of existing outstanding highway obligations proved to be inadequate as well as failing to meet the approval of the holders of such obligations. The question was again introduced in the regular session of 1933 with the result of Act 167, approved March 28, 1933, which refunded all outstanding highway obligations, including direct highway notes or bonds, toll bridge bonds, revenue bonds, road improvement district bonds, obligations of city paving districts for continuations of state highways and unpaid valid claims of the highway department for maintenance and construction activities. The act provided that the refunding bonds would be dated May 1, 1933, would be payable in twenty-five years and would bear interest at the rate of three per cent per annum, the interest to be payable semi-annually.

Other Acts, 1933 Other miscellaneous acts affecting highway activities consisted of Act 20, approved February 8, 1933, which provided for the number of lights to be maintained on state owned toll bridges; Act 67, approved March 2, 1933, which provided that no motor vehicle should be permitted to enter the state carrying a gasoline fuel supply in excess of twenty gallons on which the state tax had not been paid; Act 124, approved March 18, 1933, authorized the highway department to dispose of any surplus lands, real estate or other property obtained through right-of-way proceedings, settlement of contractors' claims or otherwise; Act 136, approved March 24, 1933, repealed all existing state legislation relative to the State Highway Commission participating in the development of aeronautics and provided for the disposal of aeronautic equipment in the possession of the department; for the purpose of following the findings of the highway audit commission and to defend suits brought to recover on a *quantum meruit* basis for work performed on contested contracts a further appropriation was made to the highway audit fund under the provisions of Act 141, approved March 24, 1933; Act 202, approved March 28, 1933, authorized an appropriation from the bond refunding fund for the repair and maintenance of state owned toll bridges.

*Act 12,
18,
19,
24,
Special
Session
1933* Although the 1932 special session of the legislature and the 1933 regular session had considered the refinancing of outstanding highway obligations, the legislative action resulting had not been wholly satisfactory to all parties concerned and the State and its officers had been made subject to suits to prevent the refunding of obligations under the legislative acts in force. No funds had been authorized for the defense of such suits and the first extra session of the Forty-ninth General Assembly convened in August of 1933 made available an appropriation for this purpose through Act 12, approved August 24, 1933. Other acts pertinent to highway affairs enacted at this session consisted of Act 18, approved September 2, 1933, for the purpose of providing for the settlement and payment of claims against the Arkansas State Highway Commission for work, labor, materials, supplies, services and for other purposes and Act 19, approved September 2, 1933, which authorized the continuance of the State Highway Audit Commission and provided for the issuance of short term notes in payment of highway claims.

*Act 11,
Special
Session
1934* Continued dissatisfaction on the part of the bond-holders with the terms accorded under existing methods of refinancing the outstanding highway indebtedness led to a call for a second special session of the 49th General Assembly which convened in January of 1934. Various differences were reconciled and compromises effected with the result of Act 11, approved February 12, 1934.

This act again made highway maintenance the first charge against all revenues received and increased such fund to a maximum of twenty-five per cent of the total amount credited to the highway fund during any fiscal year with the further provision that the sum so credited should not be less than two million dollars annually. The outstanding obligations were classified and interest rates and maturities for each classification defined. The tax on gasoline was raised from six cents to six and one-half cents per gallon and provision made for returning 7.7 per cent of the revenue so obtained to the various counties for the improvement of county roads. A schedule of fees for the registration and licensing of motor vehicles was promulgated and provision made for prorating such charges for licenses issued during the last half and last quarter of the calendar year. The act further covenants that the rate of gasoline tax and schedule of registration and licensing fees for motor vehicles as set forth shall not be reduced until all existing highway obligations of the state are discharged.

*Other Acts,
1934* Act 5, approved January 17, 1934, provided that filling station operators in Arkansas located within 300 feet of the state line could sell gasoline at the price charged in the adjoining state.

ACTIVITIES OF STATE HIGHWAY COMMISSION

Status The status of the Arkansas State Highway System as of November 1, 1934, is reflected by the following resume. Tables and charts elsewhere in this report present full details relative to the distribution of the improvements on the state highway system by types, routes, counties and maintenance districts.

STATUS OF ARKANSAS STATE HIGHWAY SYSTEM MILEAGE BY TYPES

November 1, 1934

	Miles Complete	Miles Under Constr'n or Commitment	Total
Concrete Pavement	1,024.07	12.67	1,036.74
Asphaltic Pavement	538.87	28.69	567.56
Asphaltic Retread	451.84	3.72	455.56
Gravel	5,253.90	115.77	5,369.67
Graded	844.14	5.44	849.58
Unimproved	558.58	0.00	558.58
Through Towns and Cities Over 2,500 Population (Unclassified)	166.71	11.01	177.72
TOTAL	8,838.11	177.30	9,015.41

Organization and Administration Under the provisions of the various acts relating to highway affairs promulgated by the 49th General Assembly convened in January of 1933 the Department was reorganized to the extent that the existing State Highway Commission was recalled and a new Commission created, formed of the same number of members, empowered to select a Director of Highways to actively administer the duties of the Department. The powers of the Commission were limited to construction and maintenance activities, the Highway Patrol, the collection of automobile registration fees, the enforcement of traffic rules and regulations, and the operation of state owned toll bridges being placed under the supervision of the Department of Revenue.

For the purposes of administration, the State Highway Commission as created reduced the number of districts in the state from ten to seven and provided that such districts would function in a maintenance capacity only, construction activities being controlled solely through the Little Rock office.

Maintenance Operations Maintenance requirements during the past biennium were of considerable magnitude and of a diversified character ranging from routine operations in the form of patrolling gravel surfaced highways and the clearing of right-of-ways of brush and debris to highly specialized

work in the form of replacements of pile and frame bent timber bridges and the repair and rehabilitation of high type surfacing, as well as special work incident to the proper preserving of the investment in steel and concrete structures. Certain work of the highly specialized type existed in such volume as to satisfactorily afford the forming of crews experienced in that particular specialty, for movement to various parts of the state under the control of the central office.

In addition to the central shop located at Little Rock, shops were maintained at each District headquarters for the repair and overhauling of equipment. Operations during this period also justified the investment of a considerable amount in new equipment to replace old and worn-out units which were found to be unsatisfactory for operating purposes.

The regular legislative session of 1933 provided the amount of two million dollars annually for maintenance purposes, including the administrative overhead of the Little Rock headquarters. This appropriation was later amended by the second special session of the legislature convened in January of 1934 to the extent of specifying a minimum sum of two million dollars annually and a maximum based on twenty-five per cent of the receipts from automobile registrations and collections from the gasoline tax. Through this latter provision it is anticipated that approximately two million four hundred thousand dollars will be made available for the 1935 fiscal year with perhaps slight increases in succeeding years.

While normal requirements can be satisfied with the amount now made available annually it is not considered that an appropriation in such amount is sufficiently large to care for the replacements necessary from year to year in the matter of surfacing and structures. Gravel surfaced roads have become worn and average but a slight depth of wearing course and the condition of many of the bridge structures on the highway system has become increasingly hazardous. An increasing density of traffic, together with a greater public demand for improved facilities, also has a tendency to make necessary more intensive operations than in the past with consequent greater expenditures.

Construction Activities Construction improvements during the past biennum were financed wholly with Federal Funds except for a small appropriation of State funds made available for administering the Federal allocation. Construction in general was well distributed throughout the state and many needed improvements were obtained, particularly in the closing of gaps existent on trunk line routings. Work projected, under construction or completed during the biennium is shown by the following tabulation:

	1932-1933 Program	1933-1934 Program	1934-1935 Program (Est.)
Portland Cement Concrete Pavement, miles	91	77	41
Asphaltic Pavements, High Type, miles		36	8
Asphaltic Surfacing, Medium Type, miles	139	10	34
Base Courses for Asphaltic Types, miles	169	21	37
Gravel Surfacing, miles	12	242	121
Graded and Drained, miles	76	329	145
Bridge Structures, all types, lineal feet	10,131	25,608	3,182
Railroad Grade Crossings, eliminated by relocation	6	23	8
Railroad Grade Crossings, eliminated by structures	None	8	2

Specific attention is directed to the fact that an additional appropriation of Federal funds for construction purposes in the approximate amount of two million five hundred thousand dollars will be made available to the state July 1, 1935, providing state funds for matching the Federal allocation are provided. Unless the Federal allocation is matched wholly or in part either all or a portion of such allocation will revert. As little margin exists between current revenue and fixed charges, in the form of interest requirements on outstanding obligations, the maintenance fund and the return to the counties, no recommendations are offered for the needed construction revenue for matching the Federal funds cited inasmuch as it is considered that an increase in automobile registration fees or in the gasoline tax is unwarranted at this time and that the present amount of outstanding obligations makes it imperative that this burden of debt suffer no further expansion.

Serious consideration should be given to the question, however, as the benefits accruing to the state through the expenditure of such a fund result not only in betterments to the highway system but in increased employment with its consequent returns to the various communities in which the employment occurs as well as to the many industries in the state engaged in the manufacture and distribution of materials, equipment and supplies.

Traffic Survey The past decade has witnessed a development of the State Highway System probably far greater in extent than could be anticipated when a definite system of state roads, comprising about ten per cent of the public road mileage of the state, was designated and established as the State Highway System under the provisions of Act No. 5 of the special session of 1923. The system as designated at that time comprised 6,637 miles. Subsequent to this period and during the intervening years the system was amended from time to time to include additional mileage to the extent that as of November 1, 1934, the various routings on the system embraced a total of 9,015 miles.

No definite data was collected during these years relative to the density and type as well as to the origin and destination of traffic using the various routings of the State Highway System. Realizing the importance of such information for the planning of future improvements the Highway Commission entered into a cooperative agreement with the Bureau of Public Roads in February of 1934 for a comprehensive study of the traffic flow on state highways. This study was initiated in April of 1934 and field data will be collected through approximately a twelve months' period. The statistical information thus obtained will be analyzed into various component forms and will be of importance not only to the State Highway Commission in determining the proper placing of maintenance and construction funds but will in addition be of inestimable value to industries, municipalities and other agencies interested in highways as arteries of transportation.

Railroad Traffic Supervision In the early part of 1933 the Highway Commission deemed it expedient to employ a Traffic Manager to supervise the shipping of materials and the checking of freight rates.

The functions of this office include the securing of equitable freight rates on all materials shipped, the providing for adequate rail equipment, the construction of sidetracks when necessary for economical deliveries and the negotiations for adjustment of general rate structures. These activities necessitate continuous dealings with the various traffic and operating officials of the Arkansas railroads and call for conferences with the Arkansas Corporation Commission.

This office also maintains a complete file of all tariffs issued by the railroads which affect Departmental shipments. The office also audits all freight and demurrage bills on State furnished materials before payment is made and keeps a record of actual freight expenditures, which item alone represents a considerable portion of the cost of highway construction and maintenance.

Changes in transportation facilities, rail, water and highway, have made frequent negotiations with railroad traffic officials necessary in order to secure reductions from their published freight rates and thus permit the economical transportation of highway materials by rail. The Highway Commission recognizes the fairness and necessity of utilizing the extensive transportation facilities maintained by the railroads and the physical advantage of using them in highway construction.

The office also supervises the movement of all road materials, securing thereby delivery which must be prompt, regular and uninterrupted if highway construction and maintenance operations are satisfactorily co-ordinated.

FEDERAL AID

The Federal Aid system of highways in the State of Arkansas as designated by the State Highway Commission and approved by the Secretary of the United States Department of Agriculture embraces 4,833 miles. In accordance with the requirements of the Federal Highway Act of 1921, this system is divided into two classes: primary or interstate highways, and secondary highways. The primary system embraces trunk line roads and the secondary system provides for a correlated network of connecting roads. The object of this division or classification is the formation of a system of highways national in scope, composed of the primary systems of each state, thus providing continuous routes interstate in character. The principal requirement governing the selection of the secondary system is that it co-ordinate with and serve the primary system.

The Federal Aid system in each state is limited to seven per cent of the total public road mileage of that state as shown by the records of the State Highway Commission. Of the mileage represented by this seven per cent, not more than three-sevenths may be designated as primary highways. However, if any of the routes selected and approved to comprise the Federal Aid system pass through national forests or other Federal reservations then the system may be enlarged over and above the stipulated seven per cent, in an amount equivalent to that mileage which lies wholly within the boundaries of national forests or other Federal reservations, which in the State of Arkansas amounts to approximately 175 miles.

Emergency Advance Loan On December 20, 1930, an Act of Congress (Public No. 550—71st Congress, H. R. 14804) apportioned \$80,000,000.00 as an emergency advance loan to the several states to be used by them in lieu of an equal amount of State Funds to match the regular Federal Aid funds. Arkansas' apportionment of this appropriation amounted to \$1,388,157.00. The Act provided that each State reimburse the Federal Government for the amount received, such reimbursement to be made from future Federal Aid authorization over a period of five years, beginning with the fiscal year, 1933. The deduction in the amount of \$277,631.40 was made from the State's apportionment of regular Federal Aid for the fiscal year 1933. Subsequent Federal legislation waived the requirement of reimbursement and no deductions were made from subsequent apportionments of Federal funds.

On July 2, 1932, an Act of Congress (Public No. 302—72nd Congress—H. R. 9642) appropriated \$120,000,000.00 for the same purpose as the emergency appropriation of December 20, 1930.

Arkansas' share of the 1932 appropriation amounted to \$2,101,182.00. The Act provides that the amount advanced to each State shall be reimbursed to the Federal Government over a period of ten years, commencing with the fiscal year 1938. It is a requirement that these funds be used to match unobligated balances of regular Federal Aid funds.

On June 16, 1933, an Act of Congress (Public No. 67—73rd Congress, H. R. 5755) known as the National Industrial Recovery Act, appropriated \$400,000,000.00 for highway construction. Arkansas' apportionment of this appropriation is \$6,748,335.00. With the exception of a small balance retained for unforeseen contingencies, this entire sum has been awarded to contract.

On June 18, 1934, an Act of Congress (Public No. 393—73rd Congress, H. R. 8781) appropriated \$200,000,000.00 for highway construction under practically the same provisions as the National Industrial Recovery Act. Arkansas' apportionment of this appropriation is \$3,428,049.00.

Following is a statement showing the apportionment of regular and emergency funds to the State of Arkansas, for each fiscal year from the inception of the Federal Aid Act to and including the fiscal year 1935.

REGULAR FEDERAL AID

1917	\$ 82,689.10
1918	165,378.20
1919	1,090,247.99
1920	1,596,436.09
1921	1,685,178.09
1922	1,254,142.20
1923	836,094.80
1924	1,093,376.46
1925	1,258,857.07
1926	1,275,497.00
1927	1,267,907.00
1928	1,277,896.00
1929	1,281,785.00
1930	1,284,382.00
1931	2,160,975.00
1932	2,174,786.00
1933	1,846,477.60

TOTAL (Regular Fed. Aid Apportionments) \$21,632,105.60

EMERGENCY FUNDS (LOANS)

1931	\$ 1,388,157.00
1933	2,101,182.00
TOTAL (Emergency Funds)	\$ 3,489,339.00

N. I. R. FUNDS (GRANTS)

1934	\$ 6,748,835.00
1935	3,428,049.00
 TOTAL (N. I. R. Funds).....	\$10,176,384.00
GRAND TOTAL.....	\$35,297,828.60

N. I. R. funds are available for paying the entire cost of construction items in which the Federal Government could legally participate.

No regular Federal Aid apportionments have been made subsequent to the fiscal year 1933, but the Act of June 18, 1934, contemplates that such appropriations are to be resumed, commencing with the fiscal year 1936. Regular Federal Aid funds must be matched with State funds.

Following is a summary showing the status of all Federal funds apportioned to Arkansas as of October 31, 1934:

REGULAR FEDERAL AID

1. Total Apportionments for the fiscal years 1917 to 1933, inclusive	\$21,632,105.60
2. Total Payments Received.....	21,262,614.52
 3. Balance Available.....	\$ 369,491.08

EMERGENCY FUNDS (LOANS)

NATIONAL FOREST ROADS AND TRAILS

Two National forest reserves, the Ozark and the Ouachita, are located in the State of Arkansas. These reserves are administered through the Forest Service of the United States Department of Agriculture. Headquarters of the supervisor for the Ozark reserves are located at Russellville, and at Hot Springs for the Ouachita reserves.

Classification of Forest Roads and Trails The highways serving national forests are, for administrative and other purposes, divided into two groups; namely, Forest Highways and Forest Development Roads. The latter group includes roads of comparatively narrow width, commonly known as trails.

Forest Highways Forest Highways are subdivided into three classes as follows:

- Class 1. Any Forest Road in the Federal Highway System, either wholly within or, when so designated by the Forester and Chief of Bureau of Public Roads, partly without and adjacent to the National Forests.
- Class 2. Any Forest Road not in Class 1 on an approved State Highway System, when so designated by the Forester and the Chief of Bureau of Public Roads.
- Class 3. All other Forest Roads, of primary importance to the counties or communities.

The principal object in the classification of Forest Highways is the establishing of a general index of the importance of the route and the probable character and anticipated volume of traffic which in turn influences, to some degree, the character and extent of improvement.

Designation of Routes The approximate mileage of each class of roads embraced in the present approved system of Forest Highways is as follows:

Class	Approximate Mileage
1	192
2	144
3	91
Total	427

Forest Development Roads Forest Development Roads and Trails are selected by the Forest Service, and are constructed under the direct supervision of that organization or the Bureau of Public Roads, depending on the magnitude of the work involved. Forest Development Roads and Trails are constructed primarily for the administration and protection of the forest reserves, although they are available for public travel. As the State does not participate in Forest Development Road programs, no further description or discussion of them will be made.

The following tabulation shows the apportionments of Federal funds for administration and construction expenses in connection with forest highways in the State of Arkansas up to and including the fiscal year of 1935.

Section 8 Fund (Federal Aid Road Act of July 11, 1916)	\$ 150,246.92
Federal Forest Road Construction (Act of February 28, 1919)	78,287.64
1922 (Federal Highway Act of November 9, 1921)....	18,636.00
1923	51,729.00
1924	25,305.00
1925	25,550.00
1926	33,825.00
1927	33,865.00
1928	34,501.00
1929	38,219.00
1930	41,917.00
1931	89,146.00
1931 (Public No. 550—71st Congress, approved December 20, 1930)	32,142.00
1932	92,244.00
1933	99,397.00
1933 (Public No. 302—72nd Congress, approved July 21, 1932)	54,315.00
1934 (Public No. 67—73rd Congress, approved June 16, 1933)	192,527.00
1935 (Public No. 393—73rd Congress, approved June 18, 1934)	76,504.00
Sub-Total.....	\$1,168,356.56
Deducted for administration and other expenses of Bureau of Public Roads and Forest Service (approximate)	63,000.00
Balance available for surveys and construction (approximate)	\$1,105,356.56

Ten per cent of the amount apportioned to each State is usually set aside for certain administrative expenses of the Forest Service and Bureau of Public Roads, and for other purposes. If it is later found that the entire ten per cent fund will not be required for the purposes for which allotted, the unexpended balance may be made available for surveys and construction of roads on the Forest Highway system.

Up to October 31, 1934, the State has received payments aggregating \$906,385.66, leaving a balance of approximately \$198,970.90 available for surveys and construction.

In the construction of Forest Highway projects prior to 1933 State funds have been expended in the amount of \$158,304.47. Since that time such expenditures have been negligible.

TABLE No. 1
STATUS OF COUNTIES UNDER 1927 PARITY PLAN

COUNTIES	1927 Parity		Expended for Construction				Parity Status				Expended for Maintenance		
	Allotments to Counties	R.I.D. Bonds and Claims Assumed by State	Net Due Under Parity Plan for Construction	Six Years 1927-1932	1933-1934 and Allotments	Total Construction	Total Chargeable Allocations	Pct. of Parity	Six Years 1927-1932	Seventeen* Months 1933-1934	Total for Maintenance

EXPLANATORY COMMENTS:

- a. Figures indicate county overdrawn on Parity by Bond Assumptions.
- b. The figures in column 8 are the product of column 3 plus column 7, minus Federal Aid credits for High Type Paving.
- c. "Per Cent of Parity," column 9, is the relation of the figures in column 8 to the base figures in column 2.
- d. Several counties are shown to have greatly exceeded the allotments under the 1927 Parity Plan. In most cases this was due to the fact that the Road Improvement District Bonds assumed nearly equalled, if not exceeded, the allotments calculated on construction for the six years of 1927-1932, inclusive.
- e. In those counties traversed by arterial inter-state highways, it is evident that the Parity Plan is not feasible, if an adequate system of through highways are to be constructed. This was somewhat anticipated in the law setting up the Parity Plan, but the provisions made for this purpose are not adequate.
- f. Parity was determined by prorating the \$115,064,576.84 to the counties, 50 per cent on a population basis, and 50 per cent on a revenue basis, the revenue being based on the automobile license receipts for the years 1926-27.
- g. The ninth and tenth biennial reports were used as a basis of determining the amount expended on construction for the six years of 1927-1932, inclusive.
- h. Allotments for Construction do not include 1935 apportionment.

** Includes District General Prorated

TABLE No. 2
MATURITY SCHEDULE OF REFUNDED HIGHWAY
INDEBTEDNESS

This schedule of maturities and payments includes only the approximate figures for Highway "A" and "B" Bonds and Toll Bridge "A" and "B" Bonds, if refunding is completed under schedule. The "B" Bonds included are for the interest differential. The "B" Bonds for interest in default to January 1, 1934, which are due within 15 years, are added to the recapitulation.

Yearly Maturity Schedule	Amount Interest Due	Amount Principal Due	Total Interest and Principal
1934.....	\$ 4,923,272.66		\$ 4,923,272.66

TABLE No. 2—(Continued)
RECAPITULATION

Direct Highway Obligations, "A" Bonds.....	\$ 84,000,000.00
Direct Highway Obligations, "B" Bonds, for Interest Differential.....	4,685,470.00
Toll Bridge Obligations, "A" Bonds.....	7,220,000.00
Toll Bridge Obligations, "B" Bonds, for Interest Differential.....	464,837.80
Sub-Total.....	\$ 96,369,807.80
Direct Highway Obligations, "B" Bonds, for Interest in Default January 1, 1934.....	4,470,580.00
Toll Bridge Obligations, "B" Bonds, for Interest in Default January 1, 1934.....	453,835.20
Total Highway and Toll Bridge Bonds.....	\$101,294,223.00

The following tabulation includes the closest figures available (December 1, 1934) on other classes of Highway Indebtedness being refunded. These items and amounts are approximately correct, or closest possible estimates, and are in addition to the bonds included in the foregoing maturity schedule and recapitulation.

DESCRIPTION OF OBLIGATION	Amount to be Refunded	Rate of Interest	Annual Interest on Full Amount	Date Bonds Mature
Road Imp. District "A" Bonds.....	\$ 45,611,883.47	3%	\$1,368,356.50	Jan. 1, 1949
Road Imp. District "B" Bonds.....			Amount not yet determined	
DeValls Bluff Toll Bridge Bonds, Approximate.....	436,000.00	3%	13,080.00	Jan. 1, 1950
Funding Notes Due Contractors, Approximate.....	602,074.00	3%	18,062.22	20 Years
Certificates of Indebtedness for City Aid Paving, Estimated.....	6,000,000.00	3%	180,000.00	Jan. 1, 1944
Total.....	\$ 52,649,957.47			
Bonds Listed in Recapitulation.....	101,294,223.00			
Grand Total Bonds to be Refunded	\$153,944,180.47			

Bonds of the four classes of obligations listed immediately above and the "B" bonds to be issued for interest in default on Direct Highway and Toll Bridge Bonds to January 1, 1934, fall due on the maturity dates indicated. Provision for prepayment of these bonds before that date is by means of purchase of tenders from time to time as money accumulates in special Redemption Accounts set up for that particular purpose, and it is contemplated that from year to year it will be possible to retire these obligations by the maturity dates indicated, and for sums less than the face value of the bonds. Annual interest payments would be proportionately reduced.

For more definite and specific information concerning these Highway obligations under the Refunding Act, reference should be made to a special *Refunding Bond Report* to be issued by the State Comptroller's Office as soon as the schedules have been fully worked out and the information is available.

EQUIPMENT DIVISION

The equipment requirements for the proper maintenance of an extensive highway system comprising 9,000 miles of various types of surfacing is of considerable magnitude. This problem can be better visualized when the needs of a particular section is analyzed and the resulting totals compiled.

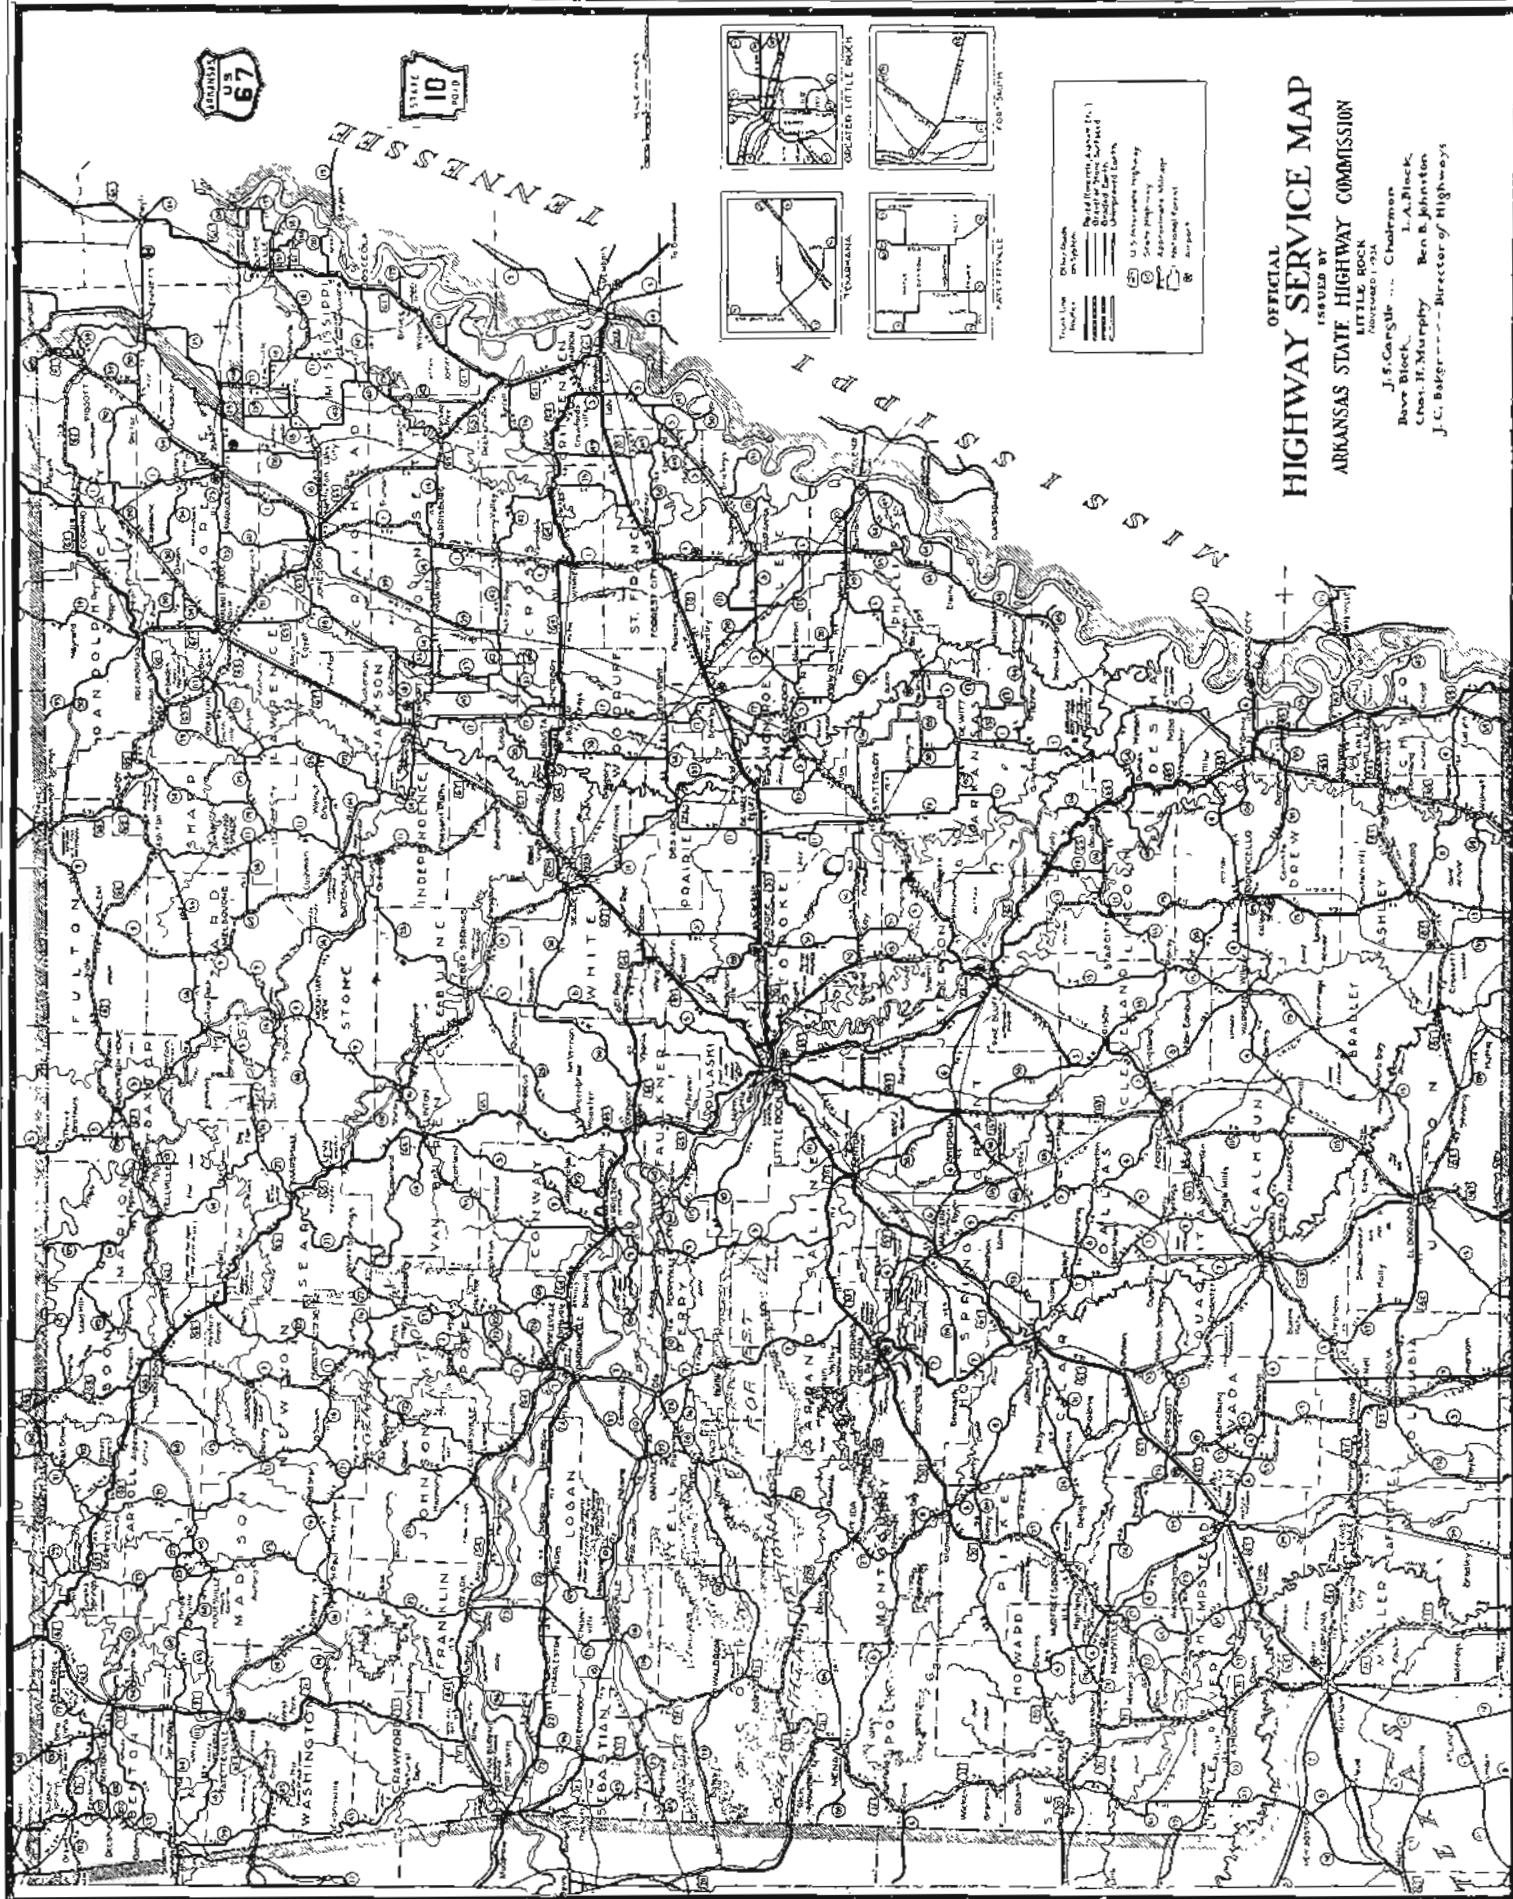

For its various operations the Department controls and operates the major equipment as reflected by an inventory as of October 1, 1934, summarized in the following tabulation together with its present estimated value.

Type of Equipment	Money Value
182 Pull Type Road Graders	\$ 53,077.72
218 One-Man Motor Patrol Graders	214,800.99
156 Crawler Type Tractors	139,202.66
34 Wheel Type Tractors.....	6,656.96
222 Items of miscellaneous equipment, Crushers, Rollers, Power Shovels, and Asphalt Equipment	131,631.48
163 Automobiles	50,944.67
78 ½-Ton Pickups and Station Wagons.....	18,570.11
436 Trucks (1 ton to 5 tons).....	123,761.68
356 Items of Shop Equipment	18,479.94
Surveying Instruments and Equipment, Estimated	36,000.00
Office Equipment and Supplies, Estimated	54,000.00
<hr/>	
Estimated Value October 1, 1934	\$847,126.21

Close supervision of operating charges covering necessary repairs and replacements indicates when it is no longer economical to keep older and obsolete units in service. Many of the units listed above were purchased prior to 1927 and during the period 1927 to 1930, inclusive, and of these it is considered the following items will be retired as soon as possible, operating costs proving excessive, all usable parts being salvaged for replacements for future requirements: 20 pull type graders; 14 one-man motor patrols; 12 crawler type tractors; 8 wheel type tractors; 22 pieces miscellaneous equipment; 25 automobiles; 12 one-half ton pickups; 36 trucks.

1934	173,771	1,952,804.66	11.24	3,026,237.98	17.41	4,979,042.64	28.65

* Official Cars not included.

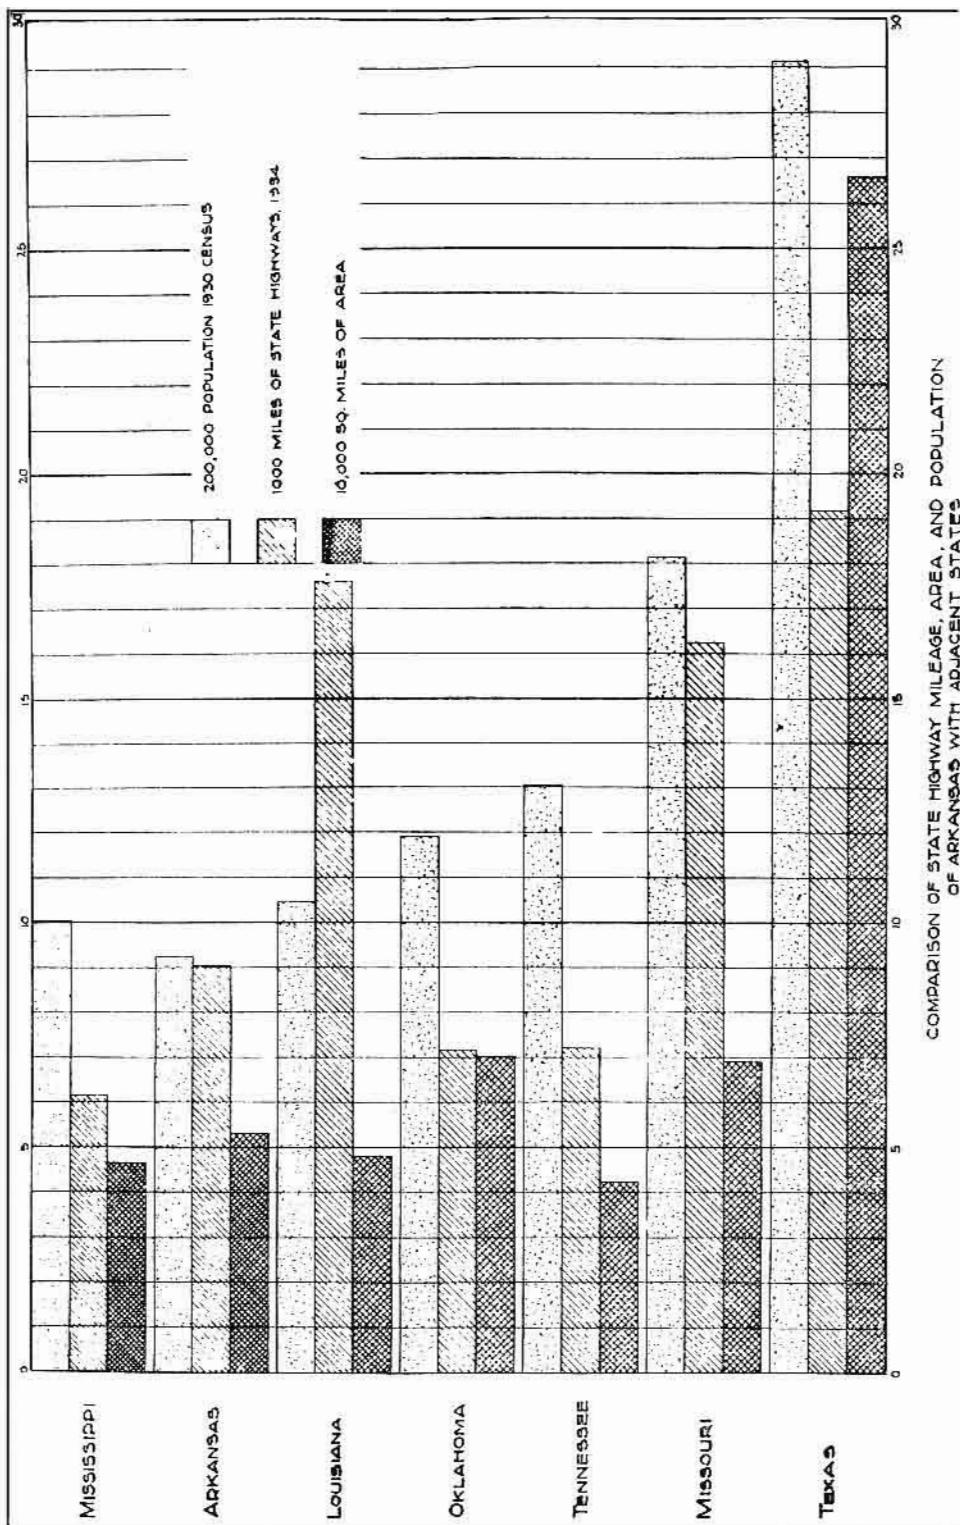

For the period 1924 to 1930, inclusive, various returns have been made to the Counties, ranging from \$1,500,000 to \$3,000,000 annually. For the period of 1931 to February, 1934, inclusive, 1c of the 6c gasoline tax returned to the Counties annually. From February, 1934, to date ½c of the 6½c gasoline tax returned to the Counties annually.

Registration shown in 1932 not indicative of true registration as quarterly permits were issued, and registration shown does not include such permits except when plate was issued in the first quarter for the entire year. A more indicative registration figure would be obtained by dividing the average receipts per vehicle from registration in 1929 and 1931 into the 1932 registration revenue which would provide an assumed real registration of 137,054 vehicles.

PART IV

Supplementary Report

PERIOD

March 1, 1932, to February 1, 1933

PAGES 113 TO 115

Part of these data are included in the Tenth Biennial Report, but the figures for the entire eleven months' period are presented, that the records as affected by the change in fiscal year may be complete.

TABLE No. 24

STATEMENT OF MAINTENANCE EXPENDITURES
MARCH 1, 1932 TO FEBRUARY 1, 1933

Purpose:	By Old Commission	By New Commission
