Pavement Testing Requires Alternating Lane Closure on Interstate 30 in Little Rock

LITTLE ROCK (1-19) – Pavement testing for future pavement rehabilitation requires alternating lane closure on I-30, according to Arkansas State Highway and Transportation Department (AHTD) officials.

The work will consist of taking core samples from I-30, between 65th Street (Exit 135) and the South Terminal. The lane closure will be conducted **daily between 9:00 a.m. and 3:00 p.m.** starting on **Wednesday, January 20** and ending on **Saturday, January 23**. The lane closure will alternate between inside and outside lanes as well as between eastbound and westbound directions.

Traffic will be controlled by signs, cones and flaggers. Drivers should exercise caution when approaching and traveling through all highway work zones. Additional travel information can be found at IDriveArkansas.com or ArkansasHighways.com. You can also follow us on [Twitter @AHTD](https://twitter.com/AHTD).
